SPEED RESTRICTIONS

All Subdivisions—

Reduced speed limits are designated by advance warning signs set in an upward angle of 45 degrees and indicate by numerals the permissible speed. Reduce speed signs, hexagon shaped, are located at the beginning of the restricted territory and also indicate by numerals the permissible speed through the restricted area. Resume speed signs bearing the letters "RS" or colored green without any lettering indicate the end of the restricted territory. On the Terminal, First, Second and Third Subdivisions, advance warning signs are located 4500 feet, on the Fifth Subdivision 3000 feet, and on all other Subdivisions, 1500 feet in advance of the reduce speed signs.

Passenger trains with all lightweight roller bearing passenger train equipment may exceed by not more than ten miles per hour the permissible speed indicated on reduce speed signs and by not more than five miles per hour the permissible maximum speed for other passenger trains except as directly affected by prescribed speed restrictions.

When operating against the current of traffic in double track territory or when one of the tracks is being used as single track, in either case if the track being used is not signaled for traffic in the direction of the movement, the maximum permissible speed for passenger trains is 59 MPH and for freight trains 49 MPH.
