TUNNEL 39 AND EUREKA NEVADA RAILWAY CROSSING AT PALISADE

Automatic block signals govern the movement of trains through Tunnel 39, just west of Palisade, as follows:

Automatic interlocked home Signal No. 635.2, located 420 feet west of west portal of tunnel, governs eastward trains.

Automatic interlocked home Signal No. 635.7, located 1090 feet east of east portal of tunnel governs westward trains. Westward trains must stop before passing over

the Eureka-Nevada Railway crossing, regardless of the position of interlocked home Signal No. 635.7.

Derails in the Eureka-Nevada Railway track on each side of the points where the Western Pacific crosses the Eureka-Nevada Railway west of Palisade are interlocked with the automatic home Signals Nos. 635.2 and 635.7 on the Western Pacific Railroad.

Trains stopped by these automatic interlocked home signals, in addition to following a flagman, as per rule, must not foul the Eureka-Nevada Railway crossing until it has been ascertained that the derails on the Eureka-Nevada Railway are set to derail.

Trains must not exceed 10 miles an hour over the Eureka-Nevada Railway crossing.

ADDITIONAL SPECIAL INSTRUCTIONS, APPLYING TO THE JOINT TRACKS BETWEEN WESO AND ALAZON, INCLUSIVE.

(A) Between Weso and Alazon tracks of the Southern Pacific Company and Western Pacific Railroad will be used jointly. All eastward trains of both Companies will use Western Pacific track Weso to Alazon, and all westward trains of both Companies will use Southern Pacific track Alazon to Weso, unless otherwise instructed by train order, except as provided in Rules E and F hereof. Each Railroad will be operated under single track rules.

(B) On the Western Pacific between Weso and Alazon one-way automatic block signals are installed to protect following movements of eastward trains and in some places westward signals will be used.

On the Southern Pacific between Alazon and Weso automatic block signals governing eastward trains will, with a few exceptions, be taken out.

When a block signal indicates STOP between Weso and Alazon train may proceed with caution not exceeding six miles an hour as follows:

Eastward trains on the Western Pacific and westward trains on the Southern Pacific will be governed by the third paragraph of Rule 509 prescribing double track procedure.

Where eastward signals on the Southern Pacific and westward signals on the Western Pacific are maintained, trains stopped by such signals will be governed by the second paragraph of Rule 509, prescribing single track procedure.

(C) Eastward regular trains and westward Western Pacific first class trains will register by ticket at Weso for the information of inferior trains. Other trains will not register.

Operator Weso must enter correctly, on the register, the information furnished by register ticket and transmit the registration of only the Southern Pacific eastward first class trains to the Western Pacific operator at Winnemucca, who must enter same on register.

Eastward Western Pacific inferior trains need not check Weso register against any eastward first class train that appears on the register at Winnemucca.

(D) A Clearance Card or Train Order authorizing an Eastward Southern Pacific regular train at Weso will apply only to Carlin where another Clearance Card or Train Order must be obtained authorizing the train Carlin to Alazon.

(E) West Carlin Detour extends from West Carlin on the Western Pacific to a connection with Southern Pacific main track in west end of Carlin Yard. East Carlin Detour extends from east ice house lead on the Southern Pacific to East Carlin on Western Pacific. Eastward Southern Pacific freight trains and other trains when so directed, also engines moving between Western Pacific and Southern Pacific yards will use these detours.

(F) East Elko Detour extends from south siding of Southern Pacific to Western Pacific freight yard. West Elko Detour extends from Western Pacific freight yard to West Elko on Southern Pacific. Western Pacific freight trains and other trains when so directed, also engines moving between Southern Pacific and Western Pacific yards will use these detours.

(G) Movements over detours at Carlin and Elko must be made with caution.

(H) Westward first class trains and westward Western Pacific second class trains register by ticket at Alazon for the information of inferior trains. Other trains will not register.

Operator Alazon must enter correctly, on the register, the information furnished by register ticket, and transmit the registration of only the Western Pacific westward first class trains to the Southern Pacific operator at Wells, who must enter same on register.

Westward Southern Pacific inferior trains need not check Alazon Register against any westward first class train that appears on the register at Wells.

(I) Eastward Southern Pacific trains will be governed by the position of the train order signal at Alazon instead of obtaining a Clearance Card as provided in Rule 83 (D).

An eastward Southern Pacific train fulfilling a schedule, or running as a section of a schedule (if schedule of the same number exists on the Southern Pacific timetable) or running Extra on the Western Pacific into Alazon will continue to do so on the double track Alazon to Southern Pacific Wells, moving only with the current of traffic.

An eastward inferior Southern Pacific train may run ahead of overdue eastward superior Southern Pacific trains Alazon to Wells on Southern Pacific track without train order authority, but must comply with Rule 83 at Wells.

(J) A Clearance Card authorizing a westward Western Pacific regular train at Alazon will apply only to Elko, where another Clearance Card must be obtained authorizing the train Elko to Carlin.

(K) Western Pacific first class trains will register by ticket at Western Pacific Carlin, placing register ticket in box at Western Pacific station. Such registration will be transmitted to Southern Pacific Operator Carlin, who must enter same on joint register. Eastward Southern Pacific first class trains will register on joint register at Southern Pacific station Carlin. A first class eastward train, which does not reach East Carlin within 15 minutes from its leaving time as registered, must run expecting to find an inferior train moving ahead of it.

(L) Eastward Southern Pacific trains will not comply with first paragraph Rule 83 at Elko and will be governed by train register at Southern Pacific Carlin. Eastward Southern Pacific first class trains not scheduled to stop at Elko, may register by ticket. Eastward Southern Pacific second class and extra trains will not register at Elko. Last paragraph Rule 96, of Rules and Regulations of the Transportation Department will apply at Western Pacific Elko. At Southern Pacific Elko only first class trains will register. Southern Pacific first class trains may register by ticket. Registration of first class trains will be transmitted to the Western Pacific operator at Elko who must enter same on register. A first class westward train which does not reach West Elko within 15 minutes from its leaving time, as registered at Southern Pacific Elko, must run expecting to find an inferior train moving ahead of it, West Elko to Carlin.

(M) Train order signal Western Pacific Elko governs eastward Southern Pacific trains. Eastward Southern Pacific trains will be created at Carlin by clearance card or train order which establishes identification and authorizes movement Carlin to Alazon. These trains will not be required to secure a clearance card at Elko except when train order signal indicates stop.

(N) On the Western Pacific between 6.30 a.m. and 6.30 p.m. before passing around curves where view is obscured, enginemen will sound whistle signal 14-L.

(O) Second paragraph of Rule 21 (A) will not apply to Southern Pacific and Western Pacific engines on joint tracks between Weso and Alazon.

To determine tonnage for helper trains on any subdivision add together the rating figures for class of engines furnished.

Figure 5 tons friction for each car over 30 cars. No car limit.

The tonnage rating is based on the maximum grade on each subdivision. Between points where grades are less than maximum greater tonnage can be handled and conductors and enginemen will be expected to fill trains to capacity of engines.
