No. 4 leaves Barstow Tuesday, Thursday, Saturday and Sunday and arrives Needles Wednesday, Friday, Sunday and Monday.

SPECIAL RULES.

ALL DIVISIONS.

1. Eastbound trains have the right of track over westbound trains of the same class when running strictly in accordance with general rules.
2. All freight trains will carry passengers, and may be flagged at any Time-table station to take on or discharge passengers.
3. The number of tons shown by rate sheet as ordinary trains for engines, is based on the general grade, but between points where the grades and other conditions are favorable, more cars can frequently be hauled, and conductors and enginemen are required to fill up trains to full capacity of their engines.
4. No engine must be detached from train while in motion. When train is stopped on grade a sufficient number of brakes must be set on front and rear cars to prevent them from running in either direction, and must not be released until engine is again attached to train.
5. Air brakes must be tested from rear end of train before leaving any station where cars have been picked up or set out, or engine has been detached from train. Trainmen will be held responsible for knowing that air is cut in and working through entire train.
6. All trains must approach and pass through yard limits under full control. This rule does not excuse the obstruction of the main track unnecessarily, or the failure to send out the proper signals for regular trains.
7. "N"—denotes day and night telegraph station

"G"—denotes night telegraph station only
 "T"—denotes day telegraph station only.

8. The speed of passenger trains will ordinarily be that prescribed in the schedule, but in cases of delay, requiring greater speed in order to enable trains to make meeting points, or to secure connections, the speed may be so moderately increased above that prescribed in the schedule, as, in the judgment of the conductor and engineman in charge of the train, may be safe and prudent, due consideration being always given to condition of track and all the circumstances. Consolidation engines (14 Class) running light, or pulling train, may not exceed a speed of twenty-four (24) miles per hour, i. e., will consume two and one-half (2 1-2) minutes in running each and every mile. Engines of all other classes when pulling freight trains may not exceed a speed of thirty (30) miles per hour, i. e., will consume not less than two (2) minutes in running each and every mile. Trains in which dead engines are being towed may not exceed a speed of fifteen (15) miles per hour, i. e., will consume not less than four (4) minutes in running each and every mile.
9. Conductors and Enginemen must have copy of General Rules in their possession at all times.
10. Look out at all sidings for derailing switches, the normal position of which would cause derailment unless lined up.

ALBUQUERQUE DIVISION.

11. For movement of trains between Albuquerque and Isleta, see A. T. & S. F. Ry. Time-table.
12. Conductors of all trains will register at Isleta, Gallup, Winslow, Flagstaff, Williams, Ash Fork and Seligman.
13. No train may leave Isleta, Gallup, Winslow, Flagstaff, Williams, Ash Fork or Seligman without receiving a train order (form 31 or 19) or a clearance card (form 902).
14. Yard limits at Gallup extend from 1615 feet east of the switch to the Catalpa mine to 2250 feet west of the most westerly switch. Yard limits at Winslow extend from 2000 feet east of the most easterly switch to 2000 feet west of the most westerly switch. Yard limits at Flagstaff extend from 1380 feet east of most easterly switch to 1380 feet west of most westerly switch. Yard limits at Williams extend from 2955 feet east of the most easterly switch to 2910 feet west of the most westerly switch. Yard limits at Ash Fork extend from 2130 feet east of the most easterly switch to 2100 feet west of the most westerly switch. Yard limits at Seligman extend 1500 feet east of the most easterly switch. For the convenience of train and enginemen all yard limits are designated by "Yard Limit" posts.
15. All trains must reduce speed to ten (10) miles per hour while crossing Canon Diablo and Canon Padre bridges.
16. No. 2 will take siding for No. 3.

17. The schedule time of No. 1, Supai to Ash Fork, is the minimum running time to be used by that train and all other westbound passenger trains and light engines between the above points. All westbound freight trains must consume four (4) minutes in running each mile, Supai to Fairview, and must not exceed schedule time of No. 33, Fairview to Ash Fork. All westbound freight trains must consume five minutes at Fairview, for the cooling off and examining of wheels.
18. Standard clocks are located in depot telegraph offices at Albuquerque, Gallup, Winslow, Williams, Ash Fork and Seligman.
19. Track to be used by trains, ordinarily, in taking siding at Winona is the track adjacent to the coal chute. When it is desired that trains shall use the track about one-half mile east thereof, and adjacent to the section house it shall be so designated in special order by the term "Old Winona."
 In like manner, track ordinarily to be used by trains at Holbrook will be the passing siding at the station. Trains may not meet or pass at "stock yards" west of station unless so designated in special order.
20. Notwithstanding that overhead warning signals have been provided at the approaches of Johnson's Cannon tunnel, between McLellan and Fairview, special attention is called to the fact that the tunnel does not provide sufficient clearance to permit of a man standing on top of an enclosed car. Employees are warned that to do so will be at their own peril and risk.

ARIZONA DIVISION.

21. Conductors of all trains will register at Seligman, Needles, Blake, Bagdad, Barstow, Kramer and Mojave.
 Conductor No. 4, will hand off "soup ticket" form 903 to the Operator at Blake, who will register the train in and out.
22. No train may leave Seligman, Needles, Blake, Bagdad, Barstow or Mojave without receiving a train order (form 31 or 19) or a clearance card (form 902). No. 6 may not leave Kramer without receiving a train order (form 31 or 19) or a clearance card (form 902).
 In absence of orders for train No. 4, at Blake, Operator will hand conductor clearance card form 902.
23. Yard limits at Seligman extend 1500 feet west of the most westerly switch. Yard limits

- at Needles extend from 2140 feet east of the most easterly switch to 3312 feet west of the most westerly switch. Yard limits at Bagdad extend from 1300 feet east of the most easterly switch to 1300 feet west of the most westerly switch. Yard limits at Barstow extend from 1300 feet east of the most easterly switch to 1300 feet west of the most westerly switch. Yard limits at Mojave extend to 1300 feet east of the most easterly switch. For the convenience of train and enginemen all yard limits are designated by "Yard Limit" posts.
24. All trains must reduce speed to ten (10) miles per hour in crossing the iron bridge over the Big Colorado River at Mellen.
 25. Standard Clocks are located in the depot telegraph offices at Seligman, Needles, Bagdad and Barstow.

SPECIAL RULES.

ALL DIVISIONS.

- 1. Eastern trains have the right of track over westbound trains of the same class when running strictly in accordance with general rules.
- 2. All freight trains will carry passengers and may be flagged at any time-table station to take on or discharge passengers.
- 3. The number of cars shown by rate sheet as ordinary trains for engines is based on the general grade, but between points where the grades and other conditions are favorable more cars may be attached, and conductors and engineers are required to fill up trains to the capacity of their engines.
- 4. No engine must be detached from train while in motion. When this is required, a sufficient number of brakes must be set on remaining train cars to prevent them from running in either direction, and must not be released until engine is again attached to train.
- 5. An engine must be tested from rear end of train before leaving any station where cars are being picked up or set out, or engine has been detached from train. Trains will be held responsible for knowing that air is cut in and working through engine.
- 6. All trains must approach and pass through yard limits under power, and must exercise the operation of the main track unnecessarily, or the track and yard limits signals for regular trains.
- 7. "T" - denotes day and night telegraph station.
