SAFETY FIRST

# MISSOURI PACIFIC RAILROAD COMPANY

## EASTERN DIVISION

## TIMETABLE

# No. 1

Effective 12:01 a. m. Sunday, May 20, 1956

CENTRAL STANDARD TIME

Superseding Timetable No. 99, effective October 30, 1955  
and all Supplements thereto.

FOR THE INFORMATION AND GOVERNMENT OF  
EMPLOYEES CONCERNED, WHO MUST ALSO CARRY  
COPY OF SPECIAL INSTRUCTIONS No. 12, THIS  
DIVISION, EFFECTIVE NOVEMBER 15, 1954; AND  
MUST ALSO CARRY COPY OF KANSAS CITY TERMINAL  
DIVISION SPECIAL INSTRUCTIONS No. 8,  
EFFECTIVE NOVEMBER 15, 1954.

The Railroad Company Reserves the Right to Vary Therefrom  
as Circumstances May Require.

R. P. HART, Vice President-Operation.

L. A. GREGORY, Assistant Vice President-Operation.

M. L. SMITH, General Superintendent Transportation.

C. F. DOUGHERTY, General Manager.

G. M. HOLZMANN, Assistant General Manager.

## SPECIAL INSTRUCTIONS

The following rules are repeated from the Uniform Code of Operating Rules for emphasis:

**GENERAL NOTICE** (in part): SAFETY is of the FIRST importance in the discharge of duty.

**RULE B:** Employes must have a proper understanding and working knowledge of and obey all rules and instructions in whatever form issued, applicable to or affecting their duties. If in doubt as to their meaning, employes must apply to the proper officer for an explanation

When properly authorized, rules may be cancelled, superseded or changed by:

- (1) General Order,
- (2) Special instructions in the timetable or in pamphlet form,
- (3) Paster in the book of rules.

**RULE E** (in part): Employes must render every assistance in their power in carrying out the rules and instructions. Courteous cooperation between employes is required for proper functioning under the rules and instructions.

**RULE 107** (in part): Conductors and engineers must bring about cooperation between all members of the crew.

Both the conductor and engineer are responsible for the safety of the train and the observance of the rules.

Although engineers are under the direction of the conductor regarding the supervision of trains, they will not comply with any instructions which imperil the safety of the train or involve a violation of the rules.

When safety of trains and observance of rules are involved, brakemen and firemen are responsible to the extent of their ability to prevent accident or violation of rules. They will not comply with any instructions which imperil the safety of the train or involve a violation of the rules.

**RULE 108:** In case of doubt or uncertainty, the SAFE course MUST be taken.

**RULE 101** (in part): Conductors and engineers must inform themselves of conditions, and during and after excessive rains, heavy storms, fogs, or any condition which may restrict visibility or affect condition of track, must restrict speed of their train to insure ABSOLUTE SAFETY, and if in doubt of being able to proceed safely, train must be placed in siding until it is safe to proceed.

When storms, fogs or other conditions obscure track or signals from points where they are plainly seen under normal conditions, speed must be restricted to insure seeing and complying with indications of any and all signals, REGARDLESS OF LOSS OF TIME.

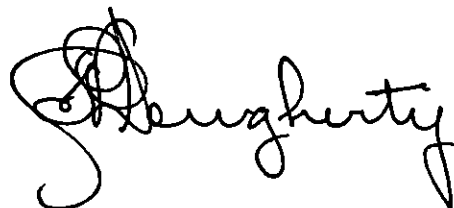

**RULES 2 and 3** of Rules and Instructions for Train Dispatchers:

The train dispatcher is in position to render valuable service in bringing about compliance with the rules; first, by habitually conforming to the rules in the daily performance of his own duties; second, by requiring compliance with the rules on the part of operators, trainmen and others with whom his duties bring him in daily contact; and, third, by immediately reporting any rule violation, any negligence of duty or any irregularity relating to the movement of trains and the handling and execution of train orders.

Train dispatcher must bear in mind that his more extended means of communication and consequent knowledge of conditions give him a point of view not available to any other person connected with train, engine or yard movements, and that it is his duty to impart that knowledge to others, when it will promote safety, or, without sacrificing safety, will expedite movement of trains.

**NOTE WELL AND REMEMBER:**

1. No officer or employe has the authority to violate a rule.
2. No officer or employe has the authority to tell anyone to violate a rule.

General Manager

## ATTENTION TRAIN AND ENGINE CREWS

Always keep in mind that the revenue passenger is the BUYER, and that it is your job to make every BUYER a satisfied customer. To that end, the following matters deserve your constant attention:

1. If an error or misstatement has been made somewhere along the route, put forth every effort to correct it. Nothing should be considered too trivial.

2. Ever be alert to the safety and comfort of your passengers, and freely give information and advice when requested. The aged, infirm and the young passenger traveling unaccompanied require special attention. Be helpful to them in every way possible, particularly in assisting them on and off trains, and occasionally inquire as to their comfort.

3. Protect both coach and sleeper passengers against undue noise or disturbance, particularly at night. Remember they pay to sleep.

4. The avoidance of arguments or friction with passengers is a test of your diplomacy. A calm and pleasant manner, regardless of the circumstances, is the best assurance of your success.

5. Keep posted on connecting line train service, arbitrary holds they have in effect for our trains, and advise passengers so as to avoid, as far as possible, any uneasiness on their part about missing connections, and when same is unavoidable, tell them what time the next connection is due to depart.

6. Cheerfully offer explanation of unusual delays and pass such information to other members of your crew — Brakeman, Porter, Pullman and Dining Car employes — so they too may advise passengers. Generally speaking, passengers will gladly accept a condition which they understand, but on the contrary are irritated when kept in ignorance.

7. Neatness of appearance and courtesy bespeak pride in your job, and create good-will for the railroad.

8. Being considerate of others is the key to popularity. This applies to the institution and individual alike. Many of your passengers may be riding a train for their first time. This is especially true of the younger generation. Kind and attentive treatment to make them feel at home creates additional passenger traffic.

9. Remember that people traveling on passes have a right to that privilege, and are entitled to the same courteous treatment as other passengers. A satisfied "free-transportation" passenger is always a booster.

10. On crowded trains, Missouri Pacific employes riding on passes should, and will if properly approached, cheerfully cooperate in seeing that revenue passengers are given every possible consideration.

11. Train Porter should keep coaches clean and in tidy condition at all times. Toilets particularly are the source of adverse comment. Inspect them frequently.

12. AVOID ROUGH HANDLING OF YOUR TRAIN. Missouri Pacific enginemen have an enviable reputation for smooth starting, running and stopping of their trains. Never lose sight of this feature, as passengers are more disposed to avoid the route that does not give them a smooth ride, than they are to exert the effort involved in registering complaints about it.

13. Of equal importance is SMOOTH HANDLING OF FREIGHT TRAINS. Rough handling results in damaged lading and delays due to damaged equipment, which creates dissatisfied customers.

14. On-time delivery of passengers and freight at destination is what the customers pay for and expect. Your best efforts, always within the zone of safety, should be extended to keep your trains on time.

Vice President-Operation

EXPLANATION OF STOPS:

- s—Regular stop.
- f—Stop on signal for passengers, mail, baggage and express.
- a—Stop on signal to receive or discharge revenue passengers.
- b—Stop on signal to receive revenue passengers.
- c—Stop on signal to discharge revenue passengers.
- m—Stop on signal to receive or discharge revenue passengers and first class mail.

EXPLANATION OF CHARACTERS:

- Ⓢ—Radio Base Station.
  - D—Diesel Fuel Oil.
  - e—Eastward.
  - P—Telephone Communication only.
  - w—Westward.
  - W—Water.
  - Y—Wye Track.
  - CS—Continuous Train Order Office.
  - LS—Limited Train Order Office (Hours of service specified by General Order).
  - TP—Telegraph or Telephone Office; not a train order office.
  - \*—Mail Crane.
  - §—Track Scales.
- Register Stations are shown in full-faced type.

**1. Eastward regular trains are superior to trains of the same class in the opposite direction, except: River Subdiv: No. 95 is Superior to No. 94.**

**2. MAXIMUM SPEED:**

The highest speed authorized for the operation of trains on main tracks, subject to LOWER speeds specified in Section 3 of these instructions, entitled "SPEED RESTRICTIONS", and lower speeds prescribed by train orders, restrictive signals and operating rules.

**2-A. MAXIMUM TRAIN SPEED: (Where Maximum Locomotive Speed is LOWER, it will Govern).**

The consist of a train includes the locomotive, or locomotives, and cars in the train. Members of the crew must know the consist of train.

The speed shown below is the highest speed authorized for the operation of trains of the specified consist:

CONSIST "A".... Diesel locomotives, with one or more, or all, cars equipped with freight car trucks.

CONSIST "B".... Diesel locomotives with one or more conventional type standard weight high center of gravity passenger cars in train of all passenger cars.

CONSIST "C".... Diesel locomotives with streamlined—HIGH center of gravity cars (equipped with electro-pneumatic brakes, tight lock couplers and roller bearing trucks), with or without one or more streamlined—LOW center of gravity cars.

Passenger cars MP 6330, 6331, 6332, 6333, 6334, 6335 and 6336, sleepers Shrine Tower, Beacon Tower and Temple Tower, and Diner 10242 are streamlined—HIGH center of gravity cars.

CONSIST "D".... Diesel locomotives with Streamlined, light-weight—LOW center of gravity cars only.

MP passenger cars of the 700 and 800 series, Sleepers with "Eagle" and "Cascade" prefix or "River" suffix, are Streamlined—LOW center of gravity cars.

--------------	--	----	----

Bonnots Mill:	No. 10 to dispatch mail.....		40
---------------	------------------------------	--	----

California:	No. 9 to dispatch mail.....		40
-------------	-----------------------------	--	----

**Marshall:** All trains reduce speed to five miles per hour passing over first five street crossings east of depot. Whistle must be sounded and bell ringing. Locomotives switching over these crossings must observe these instructions, and in addition a member of crew will flag the crossing. (See Rule 103)

City Ordinance prohibits running of cars across and switching on street crossings unless such cars be at all times, while in motion, securely fastened to locomotive pushing or pulling same. This prohibits making drop of cars in switching movements.

**Kansas City Terminal Railway:**

Special Rule No. 2. Train crews on arrival must extinguish markers on all passenger trains. Switch crews must not couple onto cars displaying lighted markers or red light.

Rule 600. Kansas City Terminal Railway operating Rules governs speed.

**3-E. TRAINS HANDLING DISABLED LOCOMOTIVES AND LOCOMOTIVES IN TOW:**

Miles Per Hour

All Diesel Locomotives and Motor Cars dead in tow or disabled in Charge of Crew:

With trucks and traction motors in good running condition..... Maximum Train Speed, or Maximum Locomotive Speed for particular locomotive whichever is lower (See Item 2-B)

With trucks or parts of same not in good running condition..... As Authorized By Superintendent

Diesel locomotives (road or switch) for movement dead in tow must have cut-out cock in supply line to control air reservoir closed and control air reservoir drained, and drain cocks left open; all switches opened; battery fuses removed; reverser drums and main power contactors blocked. Messenger will be provided at the discretion of Superintendent or Master Mechanic.

With flat spot 2 3/4" or more in length for 36" diameter wheels used on E. M. D. passenger diesels..... 10

With flat spot 3" or more in length for 40" and 42" diameter wheels used on all road and switch diesels.... 10

No restriction for flat spots shorter than above specified lengths.

**3-F. TRAINS HANDLING WORK EQUIPMENT, DERRICKS, CRANES, ETC.:**

Pile Drivers..... 25

Steam Shovels..... 25

Bridge Derrick Cars (non-revolving)..... 30

Bridge derrick cars (non-revolving) must be coupled to flat car and support provided for boom; boom must be chained or cabled to car stake irons with sufficient play to allow for not less than 3 inches nor more than 6 inches lateral movement; and uncoupling levers must be disconnected between derrick car and idler car. Derrick cars may be handled in train with boom ahead or trailing as requested by messenger accompanying.

Bridge Derrick-Pile Driver (combination machine)..... 25

Bridge derrick-pile driver (combination machine) may be shipped either as a derrick or as a pile driver. When shipped as a derrick, its movement shall be governed by the regulations applying to wrecking cranes. When shipped as a pile driver, its movement shall be governed by the regulations applying to pile drivers.

**3-F. TRAINS HANDLING WORK EQUIPMENT, DERRICKS, CRANES, ETC. (Continued):**

	Miles Per Hour
American Ditchers (self-propelling).....	25
<p>American ditchers, self-propelling, must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be supported exclusively by its cables. Bucket must be raised to clear idler car approximately eight inches and shored firmly against boom through 4 inch by 6 inch timber with all slack taken out of hoist cable. Water tank and boiler should be drained and rear of machine must be faced toward front of train. Side rods and cranks must be removed from trucks.</p>	
Locomotive Cranes or Clam Shells.....	25
<p>Locomotive cranes or clam shells must be coupled to flat car and uncoupling levers between machine and flat car must be disconnected. Boom must be disconnected from rotating portion of machine and supported entirely upon flat car. Cables need not be removed from boom, but must be left slack between machine and boom. Water tank and boiler should be drained and coal bunker should be emptied. The rear of machine must face toward front of train, except when machine is accompanied by tender for use on bridge construction work and reversal is necessary from junction point to job to place it in working position upon arrival at destination.</p>	
American Ditchers, loaded on flat cars.....	25
Yard (clam shell) and "Burro" Cranes, loaded on flat cars.	25
Jordan Spreaders and Spreader-Ditchers.....	25
<p>Jordan spreaders and spreader-ditchers must be headed in working direction, otherwise speed must not exceed 15 miles per hour until machine is headed in working direction at nearest point where turning facilities are available. The plows' wings and braces must be secured in shipping position by the pins, bolts, chains, etc., provided for this purpose.</p>	
Wrecking Cranes (non-self-propelling).....	25
<p>Note—Where maximum train speed is 25 miles per hour or less, speed of trains handling above work equipment must be restricted to five miles per hour less than such maximum freight train speed.</p>	

**3-F. TRAINS HANDLING WORK EQUIPMENT, DERRICKS, CRANES, ETC. (Concluded):**

Wrecking Cranes (self-propelling):  
The speed of trains handling wrecking cranes (self-propelling) shall be restricted according to maximum permissible speed of freight trains, Consist "A", thus:

Maximum Freight Train Speed	Permissible Speed When Handling Self-propelled Wrecking Cranes
MPH	MPH
15	10
20	15
25	15
30	20
35	20
40	25
45	30
49	30
50	30
55	35

Chemical Spray Cars, when side spray booms have been removed, or raised and fastened in vertical position..... Maximum Train Speed Consist "A" 30

Scale Test Cars (Except MPX 5121)..... 30

Scale Test Car MPX 5121..... Maximum Train Speed, Consist "A"

Scale test cars must be handled next to cabooses.

**3-G. TRAIN ORDER FORM X, REQUIRED WHEN HANDLING RESTRICTED EQUIPMENT:**

When there is to be handled any unit of equipment mentioned in Items 3-E and 3-F, above, causing the speed of the train handling to be restricted below the maximum train speed, a Train Order, Form X, must be issued, specifying the speed restriction. Conductors must require such an order before leaving the station from which such restricted equipment is handled.

**3-H. STEAM LOCOMOTIVES - MAXIMUM LOCOMOTIVE SPEED AND SPEED RESTRICTIONS:**

Because of 100% Dieselization of motive power on this division, this timetable does not include maximum locomotive speed and speed restrictions for steam locomotives. Manner of handling steam locomotives, either in service or in tow, will be governed by instructions issued by Superintendent or Trainmaster at the time of handling.
