TRAINS Nos. 53 AND 54 WILL HANDLE PASSENGERS, MAIL AND EXPRESS

Following Rules and Instructions govern operation of cabin type Interlocker at T. & P. crossing Mineola.

In order to line the plant up for M-K-T train movement, first pull lever No. 1 to full reverse and wait two minutes for unlock or until latch will go into place.

Then pull lever No. 2 and lever No. 3.

For southward movement pull lever No. 4.

For northbound movement pull lever No. 5.

Move signal lever No. 4 or No. 5 back to normal (stop) position while the train is between the home signals.

Caution: (If plant is lined for M-K-T movement and movement is not made, or if train movement through plant is completed before signal lever (4 or 5) is moved back to normal (stop) position, it will be necessary to work time release (so-marked) to restore plant to normal position.

To operate time release: Turn clockwise as far as will go, hold 5 seconds. Release and permit time release to run down (2 minutes).

All levers must be restored to normal position after train has cleared the plant.

In case of failure, make prompt wire report so superintendent of T&P at Fort Worth may be notified promptly and repairs made.

Cabin must be kept locked.
