SPECIAL RULES.

EAST-BOUND TRAINS ARE SUPERIOR TO WEST BOUND TRAINS OF THE SAME CLASS.

Unless otherwise ordered, trains must not exceed the following rates of speed:

When backing up, all trains 20 miles per hour.

On Rockport, Kerrville and Lockhart branches, passenger and mixed trains 35 and freight trains 25 miles per hour.

On all other portions of the road passenger trains may run 45, mixed 35 miles and freight 30 miles per hour.

Speed of trains between slow posts, 12 miles per hour; except when shown on slow posts. Speed through limits of Houston, 6 miles; Lockhart, 8 miles; San Antonio, 10 miles; Waco, passenger trains 8 miles and freight trains 6 miles per hour.

All trains will use ten minutes crossing Corpus Christi Reef bridge and will pass over following bridges and trestles at a speed not to exceed 15 miles per hour: Colorado River west of West Point, Little River east of Cameron, Guadalupe River west of Cuero, San Antonio River west of Runge.

The following bridges are too low to clear a man on foreign cars higher than our own cars:

Lavaca River near M. P. 102; Calaveras River M. P. 217.

Buckner Creek near M. P. W-160; Colorado River near M. P. W-169; Little River, M. P. W-232.

Trainmen will not ride on the side of covered cars approaching Hicks tank; being located on the inside of a curve will not clear.

Stations in **FULL FACED TYPE** are register stations. Except for first-class trains at Rock Island.

Engineers and Conductors of trains restricted by yard limit boards must so handle their trains that they can stop within the limits of vision.

Rule 98A will apply to and govern ALL trains in Shiner, Kenedy, Skidmore and Sinton Yards.

Initial stations are points at which trains take or change numbers and in addition Blodgett for Nos. 1 and 3, Shiner for Lockhart branch trains and Yoakum for all trains leaving there.

Hereafter when there is but one section of trains Nos. 1 and 3 they will proceed from Blodgett on a clearance signed by the operator at that point. Such clearances, however, give no rights over superior trains. In case there is more than one section of the above trains all sections will require running orders.

Operators, whenever they have orders for trains, will use blank on back of clearance card, Form 2643, and deliver same to conductor with his orders. Conductors will take receipts from enginemen on this form and conductors and enginemen will decline to accept orders unless same or a substitute written by the operator is furnished.

Under no circumstances must cars which are loaded above 10 per cent over their marked capacity be moved in trains.

Before crossing any span bridge, crews must carefully inspect train, ascertaining if cars loaded with rock or other freight have anything protruding over the sides far enough to strike bridge.

Y at Corpus Christi will only turn an engine and eight passenger cars. At Rockport an engine and five passenger cars.

That portion of Rule 435 excepting special cars belonging to this Company and occupied by officials of this Company is cancelled. Hereafter you will report all special cars moved on your trains.

Rule No. 98A will apply to and govern the second and all following sections of first-class trains.

If a train equipped with air-brakes should part while in motion engineers will immediately shut off steam and put their brake valve on lap.

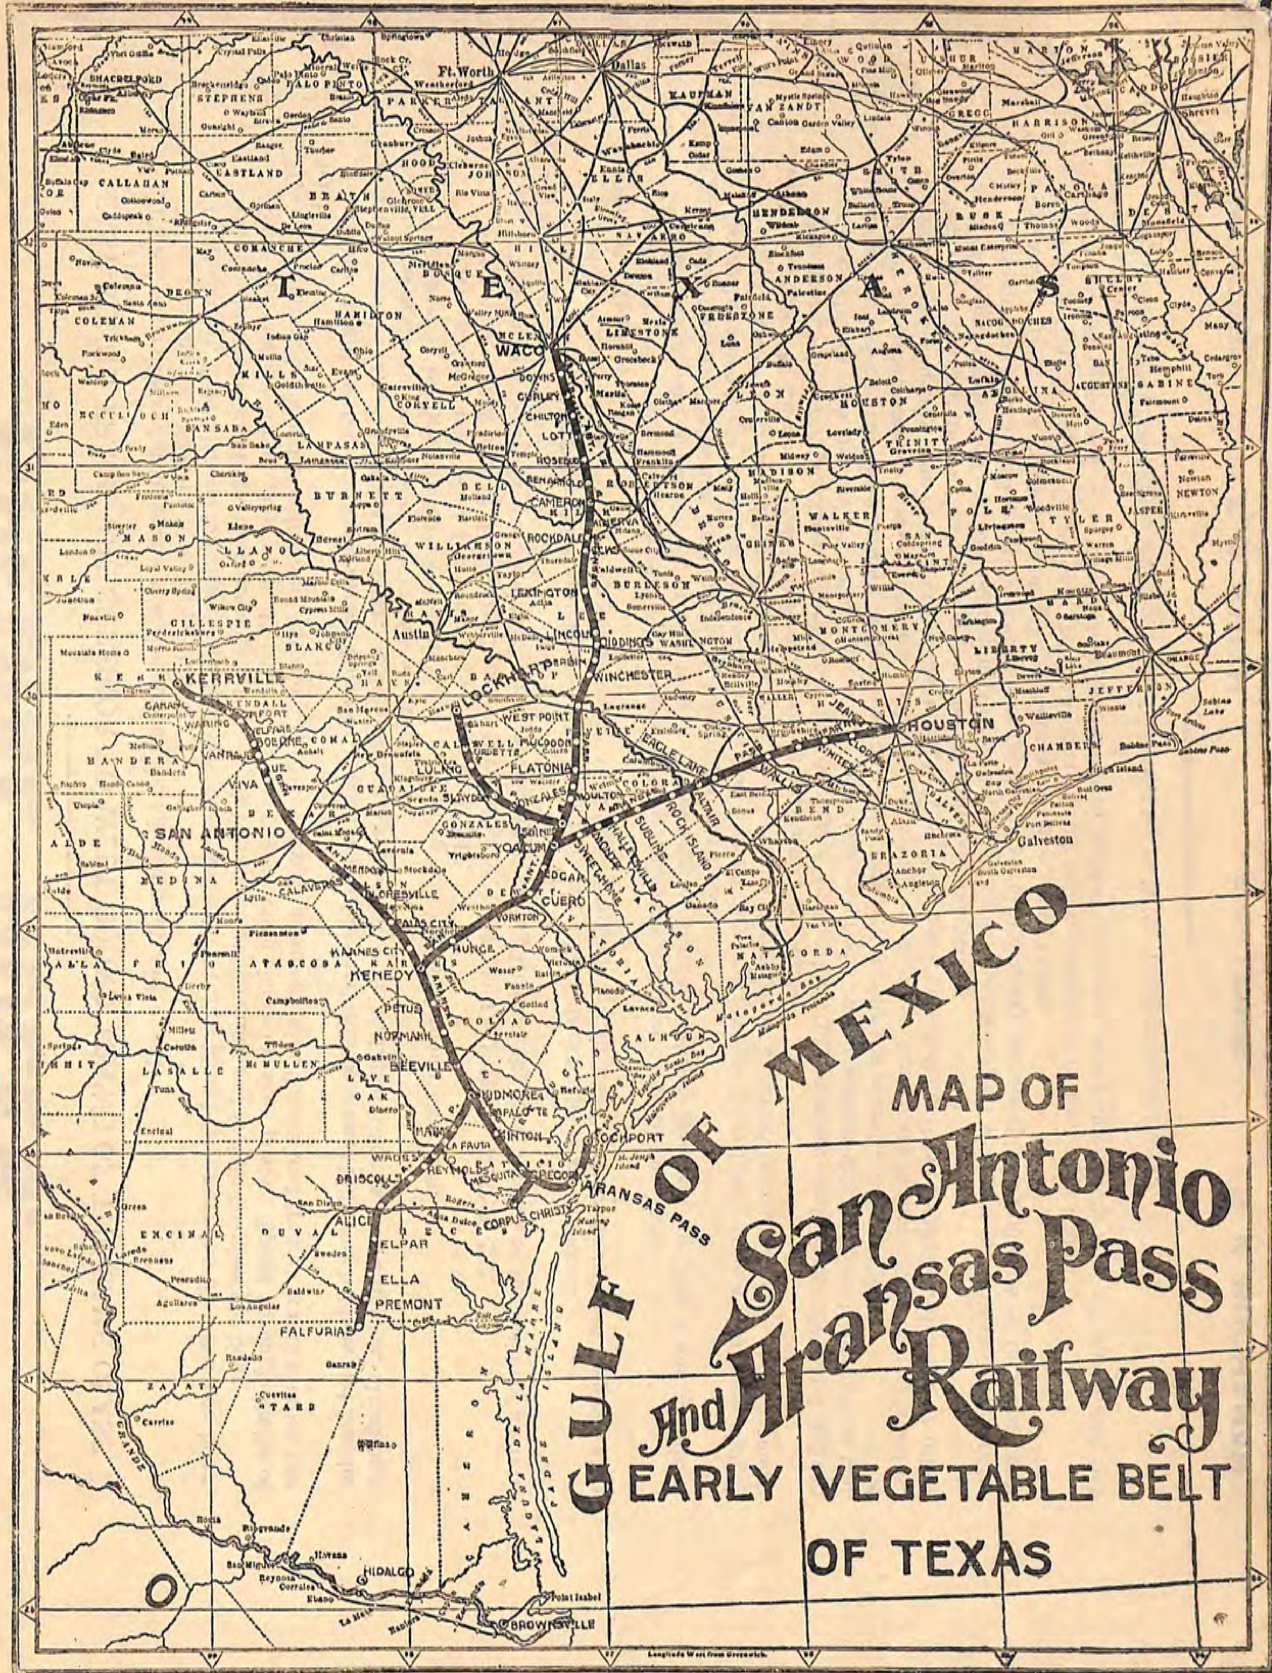

Oil, Water, Turntables, Wyes and Scales are indicated by, O, W, T, Y and S respectively.
