SPEED RESTRICTIONS

All Subdivisions—

Where automatic block and interlocking rules and signal indications require movement at restricted speed, such movement must be made prepared to stop short of train, obstruction or switch not properly lined and be on the lookout for broken rail or anything that may require the speed of a train to be reduced but a speed of 15 MPH must not be exceeded.

Reduced speed limits are designated by advance warning signs set in an upward angle of 45 degrees and indicate by numerals the permissible speed. Reduce speed signs, hexagon shaped, are located at the beginning of the restricted territory and also indicate by numerals the permissible speed through the restricted area. Resume speed signs bearing the letters "RS" or colored green without any lettering indicate the end of the restricted territory. On the Terminals, First, Second and Third Subdivisions of the Vancouver Division, advance warning signs are located 4500 feet, on the Oregon Trunk Railway 3000 feet, and on all other Subdivisions, 1500 feet in advance of the reduce speed signs.

Passenger trains with diesel-electric locomotive and all light-weight roller bearing passenger train equipment may exceed by not more than ten miles per hour the permissible speed indicated on reduce speed signs and by not more than five miles per hour the permissible maximum speed for other passenger trains except as directly affected by prescribed speed restrictions.

When operating against the current of traffic in double track territory, trains must not exceed the permissible maximum speed prescribed with the current of traffic.

Through crossovers and turnouts	15
Through Nos. 14, 15 and 16 turnouts located at Willbridge, S. P. & S. Jct., Ainsworth Jct., Scribner, east end Overlook Siding, Ft. Wright, east end South Jct. Siding, United Jct., Bowers Jct. and Forest Grove Jct.	25
Over spring switches not equipped with facing point lock, when moving in facing point direction and not using turnouts.	30
Over spring switches when moving in trailing point direction actuating switch points and not using turnouts.	30
Over spring switches when using turnouts.	15
Freight engines, except Classes Z-6, Z-8 and DE single or multiple units of 1500 or 1600 HP used in passenger service must not exceed authorized speed for freight trains in the territory where operated.	60
Engines, Classes Z-6 and Z-8 used in passenger service	60
Freight and road switcher engines, Classes DE single or multiple units of 1500 or 1600 HP used in passenger service.	65
Handling steam wrecking cranes, pile drivers or locomotive cranes	30
Handling scale test car.	30
When freight cars, except those equipped with passenger trucks and steel wheels, are handled in passenger trains, the train will not exceed authorized speed for freight trains in the territory where operated.	10
Over switches in paved streets.	10
When picking up train orders (except where hoop stands are located)	25
To avoid damage to rail and bridges by moving locomotives having main or side rods down, over the road at too high a speed, the following speeds will be maximum permitted:	
With main and side rods removed:	
All classes	20
With main rods removed and side rods in place:	
All classes	25
Over bridges	20
Engines with either or both main and side rods removed shall not be moved over any bridge at a speed in excess of 20 MPH, and the speed shall be further reduced over bridges which carry speed restrictions against the class of power being so moved. In the latter case, the speed of an engine with rods removed shall be reduced over the bridge to one-half the restricted speed for that engine in working order, as shown under "Bridge and Engine restrictions."	

Dead engines with all rods up or in place, the piston rod being parted from the crosshead and removed and the valve motion disconnected

and blocked, may be moved in trains at not to exceed the permissible speed of freight trains operating in the territory over which such engines are moved.

Dead engines with all rods up or in place and piston rod not disconnected from the crosshead may be moved in trains at a speed not to exceed 12 M. P. H.

Bridge or other restrictions applicable to these engines when in operating condition to be observed.

For engines coming from the shop, to prevent running hot authorized maximum speed is.....25 M.P.H.
