Trains must get numbered clearance card before leaving Dodge City, Satanta and Boise City.

Trains and engines will use C.R.I. & P. track between C.R.I. & P. Jct. and Cimarron Valley Jct. under C.R.I. & P. yard limit rules as follows:

Yard limits indicated by yard limit board. Within these limits main track may be used, clearing the time of first class trains, unless main track is seen or known to be clear. Second and third class and extra trains must move within yard limits 'under control'. 'Under control' must be understood to mean 'able to stop within distance track is seen to be clear'. Whosoever obstructs the main track within yard limits must protect by a flagman when the obstruction cannot, for any reason, be plainly seen from approaching train for a distance of at least seven hundred and fifty (750) feet. In case of collision, responsi-

bility rests with the moving train or engine. At night, or in stormy weather, proper lights must be displayed on all trains, cars or engines obstructing tracks within yard limits. Trains carrying passengers must be protected at all times.

No switch lights on Cimarron Valley District.

Cimarron Valley Jct. switch normally lined for Cimarron Valley Dist. trains.

Trains via Cimarron Valley District register at C.R.I. & P. station Dodge City.

Colorado Division trains use Western Division, Cimarron Valley District tracks at Boise City.

**SIGNAL SYSTEM TWO:**

In effect MP 352.3 to MP 353, Dodge City.

**FIRST DISTRICT.**

**WESTERN DIVISION. 4**

At Newton, between Mo. Pac. Crossing, 0.5 mile east of passenger station, and First Street, 0.4 mile west of passenger station, the first six tracks south of passenger station are designated as passenger yard tracks Nos. 1, 2, 3, 4, 5 and 6, respectively. Rule 105 applies. Between these points trains must not exceed 10 MPH.

Two Main tracks between MP 185.5 and MP 216.5.

Three Main tracks between MP 216.5 and MP 218.2.

**RULE 251:**

In effect between First St., 0.4 mile west passenger station, Newton, and C.R.I.&P. Crossing.

Between C.R.I.&P. Crossing and Hutchinson Jct. there is no superiority of trains. Trains and engines within these limits must proceed prepared to stop short of train, obstruction or switch not properly lined, but not exceeding 20 MPH; between these points main track may be used not protecting against regular and extra trains and engines. Westward trains via First District will use main track No. 3 between C.R.I.&P. Crossing and Hutchinson Jct. unless otherwise provided.

Eastward trains from First District moving between Hutchinson Jct. and C.R.I.&P. Crossing must not be run against current of traffic except on instructions from Yardmaster or his representative.

**SIGNAL SYSTEM ONE:**

In effect at Sand Creek Interlocking, Way Interlocking, C.R.I.&P. Crossing and Kinsley Interlocking.

**SIGNAL SYSTEM TWO:**

In effect between MP 188 and MP 214; at Hutchinson Jct, MP 218.2; and Mo. Pac. Crossing, MP 235.7.

**Rule 261 (CTC):**

In effect between Kinsley, MP 316.7 and east switch siding, MP 315.

Train order signal at C.R.I.&P. Crossing governs trains moving on Three Main tracks.

Train order signal at Kinsley governs Second Dist. trains only.

Trains must get numbered clearance card before leaving Newton.

Trains originating at Sand Creek, Way (Except trains enroute Panhandle Division) and Kinsley must get numbered clearance card before leaving.

An Eastward regular train authorized on the Second Dist. will assume the schedule of the same number on the First Dist. at Kinsley or Hutchinson, unless otherwise provided.

Time of trains at Way applies at interlocked switch at east end of freight yard.

5 WESTERN DIVISION.

SECOND DISTRICT.

AUTOMATIC BLOCK SYSTEM

AUTOMATIC TRAIN SIGNAL SYSTEM

C.T.C.

2 Tracks

2 Tracks

Between Hutchinson and Panhandle Jct. there is no superiority of trains. Trains and engines within these limits must proceed prepared to stop short of train, obstruction or switch not properly lined, but not exceeding 20 MPH; between these points main track may be used not protecting against regular and extra trains and engines.

Between MP 352.1 and MP 353 (Dodge City), there is no superiority of trains. Trains and engines within these limits must proceed prepared to stop short of train, obstruction or switch not properly lined, but not exceeding 20 MPH; between these points main track may be used not protecting against regular and extra trains and engines.

Two Main tracks between Hutchinson and Panhandle Jct.

Two Main tracks between Dodge City and Wright.

SIGNAL SYSTEM ONE:

In effect at Kinsley Interlocking and between Kinsley and Dodge City MP 352.3, including both tracks between Wright and Dodge City.

SIGNAL SYSTEM TWO:

In effect Hutchinson to but not including east switch siding Kinsley MP 300.9, and between MP 352.3 (Dodge City) and MP 353.

Rule 261 (CTC):

In effect between Dodge City, MP 352.3, and east switch siding Kinsley, MP 300.9, including both tracks between Dodge City and Wright.

Time of trains at Wright applies at end of Two Tracks.

Trains must get numbered clearance card before leaving Dodge City.

Trains originating at Kinsley must get numbered clearance card before leaving.

Westward trains, except Panhandle Division Trains, must get numbered clearance card before leaving C.R.I. & P. Crossing.

A Westward regular train authorized on the First Dist. will assume the schedule of the same number on the Second Dist. at Hutchinson or Kinsley, unless otherwise provided.

Average speed per hour.

**SECOND DISTRICT.**

**WESTERN DIVISION. 6**

AUTOMATIC BLOCK SYSTEM

AUTOMATIC TRAIN STOP SYSTEM

C.T.C.

Between Hutchinson and Panhandle Jct. there is no superiority of trains. Trains and engines within these limits must proceed prepared to stop short of train, obstruction or switch not properly lined, but not exceeding 20 MPH; between these points main track may be used not protecting against regular and extra trains and engines.

Between MP 352.1 and MP 353 (Dodge City), there is no superiority of trains. Trains and engines within these limits must proceed prepared to stop short of train, obstruction or switch not properly lined, but not exceeding 20 MPH; between these points main track may be used not protecting against regular and extra trains and engines.

Two Main tracks between Hutchinson and Panhandle Jct.  
Two Main tracks between Dodge City and Wright.

**SIGNAL SYSTEM ONE:**  
In effect at Kinsley Interlocking and between Kinsley and Dodge City MP 352.3, including both tracks between Wright and Dodge City.

**SIGNAL SYSTEM TWO:**  
In effect Hutchinson to but not including east switch siding Kinsley MP 300.9, and between MP 352.3 (Dodge City) and MP 353.  
Rule 261 (CTC):  
In effect between Dodge City, MP 352.3, and east switch siding Kinsley, MP 300.9, including both tracks between Dodge City and Wright.  
Time of trains at Wright applies at end of Two Tracks.  
Trains must get numbered clearance card before leaving Dodge City.  
Trains originating at Kinsley must get numbered clearance card before leaving.  
Westward trains, except Panhandle Division Trains, must get numbered clearance card before leaving C.R.I.&P. Crossing.  
An Eastward regular train authorized on the Second Dist. will assume the schedule of the same number on the First Dist. at Kinsley or Hutchinson, unless otherwise provided.

Trains must get numbered clearance card before leaving Larned and Jetmore.

No switch lights on Larned District.

Rules Nos. 10(A), 17, 315, 509, 511, D-514, 660, 1000(C), and Definitions of Medium Speed and Restricted Speed, Pages 106, 111, 114 and 115, Operating Department, are amended as follows:

Rule 10(A). Second paragraph amended to read:

Permanent signs, yellow with numerals, will be located not less than 2500 feet in advance of locations where speed of trains must be reduced. The numerals thereon nearest the track, or those at the top of the sign, indicate the maximum speed for passenger trains, and the other numerals the maximum speed for freight trains, except that where only one numeral is shown it shall govern the speed of both passenger and freight trains. Indicated speeds must not be exceeded until rear of train has passed a permanent green resume speed sign. There may be more than one yellow sign in advance of a green sign, in which case the reduced speed shown on each yellow sign must be observed in succession until rear of train has passed the green sign.

Rule 17. First paragraph amended to read:

The headlight will be displayed to the front of every train by day and night. It must be extinguished when a train turns out to meet another train and has stopped clear of main track. In case of headlight failure enroute at night, if repairs cannot be made promptly, a white lantern must be placed on the front or leading end of train and the train should proceed at restricted speed while the head end is passing through stations and over street and highway crossings. The whistle must be sounded frequently and the bell must be rung continuously. The train dispatcher should be notified at first opportunity.

Rule 315. Amended to read:

A train, other than a passenger train, will not be permitted to follow a train, other than a passenger train, into a block, except when authorized by train order or permissive signal, and when such movement is authorized the following train must proceed through the block prepared to stop short of train or obstruction, but not exceeding twenty miles per hour.

Rule 509. Amended to read:

When a train or engine is stopped by a "stop and proceed" signal, it may:

(a) On single track, where block can be seen to be clear of opposing movement, proceed at once at restricted speed. Where block cannot be seen to be clear of opposing movement, wait five minutes and then proceed at restricted speed, except when view of track ahead is not clear for at least 800 feet at any location within the block, movement must be stopped and then protected by being preceded by a flagman. Engines so equipped must display red gyrating headlight.

(b) Where facing point switch is located immediately beyond signal and switch is lined for turnout, train may, without stopping, pass such signal at restricted speed to enter turnout, provided main track is clear to fouling point.

(c) On two or more tracks, proceed at once at restricted speed.

Rule 511. Amended to read:

A train or engine which has entered a block and is delayed in the block, must make movement beyond point of delay at restricted speed until next governing signal can be seen to indicate other than "stop" and intervening track is seen to be clear.

Rule D-514 changed to Rule 514. Amended to read:

Where separate signal governing train movements from siding or other track to main track indicates "stop" and train has other authority to enter main track, the main track switch may be opened and after the expiration of five minutes, train may proceed, complying with Rules 99 and 509(a) on single track, and Rules 99 and 509(c) on two or more tracks.

When heading out through a spring switch, the same practice will govern except that after lead wheels have fouled circuit, spring switch must be returned to normal.

This rule will also apply where such signals are located at non-continuous interlocking stations and are set for automatic operation during hours office is closed.

Rule 660. Amended to read:

A train or engine which has entered a block and is delayed in the block, must make movement beyond point of delay at restricted speed until next governing signal can be seen to indicate other than "stop" and intervening track is seen to be clear.

Rule 1000(C). Amended to include:

In the application of Operating Rule 1000(C) the Federal Communication Commission has modified its rules to permit an employee, authorized by the Railway Company to do so, to operate a mobile radio unit without having passed an examination on the rules; but an employee must pass an examination before operating a fixed or base radio station.

MEDIUM SPEED—A speed not exceeding 40 miles per hour.

RESTRICTED SPEED—A speed that will permit stopping short of another train or obstruction, but not exceeding 20 miles per hour.

Definitions, Page 104, amended to include:

AUTOMATIC TRAIN STOP SYSTEM (ATS).

A system so arranged that its operation will automatically result in the application of the brakes until the train has been brought to a stop.

1. Except as otherwise provided, Eastward trains are superior to Westward trains of the same class.

2. YARD LIMITS.

# 11 WESTERN DIVISION.

# SPECIAL RULES.

## 3. SPEED REGULATIONS—(Cont'd).

### (F) Steam Wrecking Cranes, etc.

Trains handling steam wrecking cranes, steam shovels, clam shells, ditchers, pile drivers, spreaders (except spreaders with wings folded and fastened), and similar machinery moving on their own running gear, must not exceed speed of thirty (30) miles per hour at any point on the First and Second Districts, and twenty (20) miles per hour at any point on other districts.

### (G) Locomotives Handled Dead in Trains.

Locomotives handled dead in trains with side rods in position are not to be run faster than twenty (20) miles per hour;

With side rods all removed and all drivers on rail fifteen (15) miles per hour;

With one pair of wheels "swung" or suspended off rail, ten (10) miles per hour;

Locomotives operating under their own steam with all side rods in place and one main rod removed, must not be operated to exceed following speeds:

| 20 MPH  |       |        | 25 MPH        | 35 MPH                                       |
|---|-------|--------|---------------|--|
| All Freight and Switch Locomotives include types: |       |        | Passenger     | All Locomotives Except Mountain Type Include |
| 0-4-0   | 2-6-2 | 2-10-0 | Mountain Type | 4-4-0  |
| 0-6-0   | 2-8-0 | 2-10-2 | Includes      | 4-4-2  |
| 0-8-0   | 2-8-2 | 2-10-4 | 4-8-2         | 4-6-0  |
| 2-6-0   | 2-8-4 |        | 4-8-4         | 4-6-2  |
|   |       |        |               | 4-6-4  |

### (H) Spring Switches, Turnouts and Crossovers.

In heading in or out over the following spring switches, turnouts and crossovers, trains or engines must not exceed indicated speed. On all other main track turnouts and crossovers not listed herein on First and Second Districts trains or engines must not exceed a speed of fifteen (15) miles per hour. On all other turnouts and crossovers, trains or engines must not exceed speed of ten (10) miles per hour.

## 4. DANGEROUS OBSTRUCTIONS. (See Rule 761).

## 5. SPECIAL RULES AND FACILITIES.

(A) C.R.I.&P. Crossing: Following whistle signals indicate route:

### EASTWARD

Eastward Main track \_\_\_\_\_  
 Westward Main track \_\_\_\_\_ 0  
 Eastward Freight lead \_\_\_\_\_ 0 \_\_\_\_\_  
 Westward Freight lead \_\_\_\_\_ 0 \_\_\_\_\_ 0

### WESTWARD

Eastward Main track \_\_\_\_\_ 0  
 Westward Main track \_\_\_\_\_  
 Main Track No. 3 \_\_\_\_\_ 0 \_\_\_\_\_ 0  
 Fairgrounds \_\_\_\_\_ 0 0 \_\_\_\_\_ 0

**5. SPECIAL RULES AND FACILITIES—(Cont'd).**

**(B) CENTRALIZED TRAFFIC CONTROL (CTC).**

On Second District, between MP 352.3 (Dodge City) and MP 300.9 (Kinsley), including both tracks between Dodge City and Wright, and on First District, between MP 318.4 and MP 315.0 (Kinsley). Rule 261 in effect.

Following switches are DUAL control, normally handled by dispatcher.

**KINSLEY—First District Junction.**

**OFFERLE—Each end of sidings.**

**BELLEFONT—Each end of siding.**

**SPEARVILLE—Each end of sidings.**

**WRIGHT—Each end of east siding, both ends of crossover between siding and main track, end of two tracks.**

**DODGE CITY—East end of freight leads and both ends of crossovers between main tracks located near east end of freight leads.**

All other switches within these limits are hand throw.

**(C) RULES FOR THE OPERATION OF AUTOMATIC TRAIN STOP (ATS), PASSENGER SERVICE.**

Rules for the Operation of Automatic Train Stop do not supersede or dispense with the observance of other rules and instructions.

Except as otherwise provided, an engine in passenger service in Automatic Train Stop territory, as shown in time table, must be equipped with operative Automatic Train Stop device. The engineer must see that Automatic Train Stop cut-out cock is cut in and sealed and check car card Form 1167-S to assure himself the device has been tested and is operative. Enginemen handling the engine where Automatic Train Stop is not in operation must make same observation and promptly report by wire if cut-out cock not sealed or car card fails to indicate proper test has been made.

When an engine passes over an inductor in approach to a signal indicating other than a "clear" signal, an automatic brake application will occur, unless prior acknowledgment has been made within 15 seconds. When such application has occurred, the brake valve must be lapped immediately and after sixty seconds, an acknowledgment made. Brakes may then be released. If proper acknowledgment has been made approaching other than a "clear" signal, a bell will sound when the receiver of engine passes over inductor.

Enginemen may also acknowledge before passing over an inductor to avoid an automatic application of the brakes when running backward at signals governing movements in the opposite direction.

Within or without Automatic Train Stop territory, an automatic brake application may occur when the Automatic Train Stop equipment becomes damaged or defective. If brakes cannot be released as prescribed above, Automatic Train Stop equipment must be cut out and promptly reported.

Seal on cut-out cock must not be broken or Automatic Train Stop cut out, unless device fails to operate properly.

Automatic Train Stop failures and interruptions and removal of seals must be reported by wire from first available point of communication.

When the Automatic Train Stop device on an engine fails or is cut out enroute in Automatic Train Stop territory, train may proceed according to signal indication, not exceeding 79 miles per hour. If the Automatic Block Signal System is out of service, train may proceed at Restricted Speed, except; if Manual Block is established in advance of the train on which the device is inoperative, train may proceed not exceeding 79 miles per hour.

When a train, moving in Automatic Train Stop territory with the device inoperative, is stopped by a "Stop and Proceed" signal, it may proceed in accordance with amended Rule 509 or if in CTC territory in accordance with Rule 655.

**5. SPECIAL RULES AND FACILITIES—(Cont'd).**

**LOCATION JUNCTIONS, AND NORMAL POSITION OF SWITCH.**

**Hutchinson:** Hutchinson Junction M P 218.2 (Junction First and Second Districts) Spring, normal for Eastward Main Track.

**Ellinwood:** First District Junction with Middle Division M P 259.2. Normal for First District trains.

**Great Bend:** First District Junction with Great Bend District MP 269.7. Normal for First District trains.

**Larned:** First District Junction with Larned District M P 291.9. Normal for First District trains.

**Dodge City:** Cimarron Valley Junction, Cimarron Valley District MP 1.1. Normal for Cimarron Valley District Trains.

**Satanta:** Satanta Junction, Cimarron Valley District and Manter District M P 58.2. Normal for Cimarron Valley District trains.

**Keys:** B.M.&E. Junction, Cimarron Valley District and B.M.&E. Railroad M P 144.3. Normal for Cimarron Valley District trains.

**Boise City:** Cimarron Valley District Junction with Dumas District M P 158.2. Normal for Dumas District trains.

**Boise City:** West end Cimarron Valley District, East end Colorado Division M P 159.8. Normal for Colorado Division trains.

**Springfield:** Manter District Junction with Boise City District South Junction M P 95.4. Normal for Colorado Division trains.

**Springfield:** Manter District Junction with Boise City District North Junction M P 97.2. Normal for Colorado Division trains.

**6. RAILROAD CROSSINGS AND JUNCTIONS.**

| Scott City     | Mo.Pac Crossing, M.P. 118.9 .....   | Standard  | —              |

Scott City, Mo. Pac. Crossing, protected by electrically locked derrails set normally against A.T.&S.F. Railway. Trains must stop before reaching derail. Member of crew will go to crossing, and if indicators located near levers indicate proceed, levers may be operated and plant lined for passage of A.T.&S.F. trains. If an indicator is at stop, see that no train is approaching on Mo. Pac. tracks, go to box marked "RELEASE" and operate clockwork time release on this box, turning the knob to the right as far as it will go and then release it. After four minutes time has elapsed indicator should clear, and levers can be operated.

Derrails must be restored to derailing position and levers placed normal and locked after using.

Sterling, Mo. Pac. Crossing, occupancy of preliminary section East or West of the crossing, indicated by sign, locks circuit against Mo. Pac. in both directions, and in case of an eastward train failing to complete movement over the crossing due to switching or other causes, the circuit can be released to the Mo. Pac. by opening either the eastward siding switch or transfer switch.

6. RAILROAD CROSSINGS AND JUNCTIONS—(Cont'd).

Burrton, Stafford and Sterling, when train is stopped by home signal and no train or engine movement in evidence on opposing route a member of crew will proceed to crossing and if light in box marked "Santa Fe Indicator" is lighted he will hand signal his train or engine over crossing. If light indicator not burning train will move one rail length inside home signal, stop, wait one minute, and then proceed as per amended rules 509(a) or 509(c).

If entire train has passed over crossing, clearing home signals, and necessary to make movement in opposite direction, signals can be cleared by inserting switch key in "key circuit controller" (located on side of signal case at each home signal), turning key as far as possible, then removing same.

7. SIDINGS, SPURS AND FLAG STOPS NOT SHOWN ON SCHEDULE PAGE OF TIME TABLE.

11. STATUTORY REGULATIONS.

In Kansas, it is lawful for the Conductor to eject from the train any passenger who refuses upon demand to produce a proper ticket or other transportation, or pay fare to his destination, and he may be expelled at any point on the line of the road at which there is a station where the person ejected may at least get lodging.

The Kansas statutes prohibit gambling and the practice of any confidence games.

Drunken or disorderly persons may lawfully be expelled from the train at any place, provided the place is not such as to cause want or injury, this may be done whether fare has been paid or not.

In Oklahoma a passenger who refuses to pay his fare, or to conform to any lawful regulation of the carrier, may be ejected from the vehicle by the carrier. But this must be done with as little violence as possible, and at any usual stopping place, or near some dwelling house. After having ejected a passenger, a carrier has no right to require the payment of any part of his fare.

In Colorado, a railroad company has a right to eject from its train any passenger who refuses upon demand to produce a proper ticket or other transportation, or pay his fare to his destination, and he may be expelled at any station where suitable accommodation can be procured for his safety and comfort.

Drunken or disorderly persons, or others whose conduct or appearance is such as is calculated to operate as a serious annoyance to other passengers, or is disgusting, or a passenger who is guilty of gross misconduct, either by insulting or assaulting other passengers or train employees, who uses vile or profane language in the car, or who threatens to assault other passengers or train employees, may lawfully be expelled from the train at any station where suitable accommodation can be procured for his safety and comfort; this may be done upon a tender of refund of the unearned portion of the fare.
