RULES AND OTHER GOVERNING PROVISIONS

GENERAL RULES AND REGULATIONS

Item	SUBJECT	APPLICATION
5	DESCRIPTION OF GOVERNING CLASSIFICATION, AND RULES TARIFFS	▲The terms "Governing Classification", "Uniform Freight Classification", and "Rules and Regulations in GN Freight Tariff 440-Series and WTL Freight Tariff 214-Series", when used herein, mean respectively: (a) Uniform Freight Classification 7, I.C.C.A-7, Western Classification Committee Agent (See Exception). (b) GN Freight Tariff 440-0, I.C.C.A-8730. (c) WTL Freight Tariff 214-J, I.C.C.A-4373. EXCEPTION.-On North Dakota Intrastate Traffic tariff will be governed by Western Classification 78, I.C.C.36, Western Classification Committee, Agent.
10	STATION LISTS AND CONDITIONS	This tariff is governed by the Official List of Open and Prepay Stations 79, I.C.C.A-44, issued by Station List Publishing Company, Agent, to the extent shown below: PREPAY REQUIREMENTS AND STATION CONDITIONS (a) For additions and abandonments of stations, and except as otherwise shown herein, for prepay requirements, changes in names of stations, restrictions as to acceptance or delivery of freight, and changes in station facilities. When a station is abandoned as of a date specified in the above named tariff, the rates from and to such station as published in this tariff are inapplicable on and after that date. GEOGRAPHICAL LIST OF STATIONS (b) For geographical locations of stations referred to in this tariff by station numbers. STATIONS NUMBERS (c) For the identification of stations when stations are shown or referred to by numbers in this tariff.
15	EXPLOSIVES, DANGEROUS ARTICLES	For rules and regulations governing the transportation of explosives and other dangerous articles by freight, also specifications for shipping containers and restrictions governing the acceptance and transportation of explosives and other dangerous articles see Agent T.C.George's Freight Tariff 15, I.C.C.15.
20	REFERENCE TO TARIFFS, ITEMS, NOTES, RULES, ETC.	(a) Where reference is made in this tariff to tariffs, items, notes, rules, etc., such references are continuous and include supplements to and successive issues of such tariffs and reissues of such items, notes, rules, etc. (b) Where reference is made in this tariff to another tariff by I.C.C. number, such reference applies also to such tariff to the extent it may be applicable on intrastate traffic or traffic, to, from or through Canada.
25	TERMINAL OR TRANSIT PRIVILEGES OR SERVICES	Shipments made under the rates contained in this tariff are entitled also to terminal and transit services and privileges, and are subject to the charges, allowances, rules and regulations legally applicable thereto, as provided in separately published, lawfully filed tariffs. EXCEPTION When provisions of this tariff specifically cover any such charge, allowance, rule or regulations, corresponding or conflicting provisions in such separate tariffs will not apply.
35	TRANSFER BETWEEN CONNECTING CARRIERS	The joint rates published herein include all charges for switching, drayage, or other transfer services at intermediate interchange points on shipments handled through and not stopped for special services at such intermediate interchange points.
40	CONSECUTIVE NUMBERS	Where consecutive numbers are represented in this tariff by the first and last numbers connected by the word "to" or a hyphen they will be understood to include both of the numbers shown. If the first number only bears a reference mark such reference mark also applies to the last number shown and to all numbers between the first and last numbers.
▲ 45	CAPACITIES AND DIMENSIONS OF CARS	Governed by Official Railway Equipment Register, I.C.C.RER 353 (The Railway Equipment and Publication Company, Agent) for marked capacities, lengths, dimensions and cubical capacities of cars. When provisions in this tariff are subject to marked capacities of cars to determine minimum weights, the marked capacities of the cars will be as shown in the above referred to equipment register, regardless of different marked capacities that may be shown on the cars. Governed by WTL Freight Tariff 300-I, I.C.C. A-4330 for gallonage capacities of tank cars.

▲ Denotes changes in wording which result in neither increases nor reductions in charges.

RULES AND OTHER GOVERNING PROVISIONS

GENERAL RULES AND REGULATIONS

Item	SUBJECT	APPLICATION
50	ESTABLISHMENT OF RATES ON BASIS OF COMBINATION OF LOCALS	Carriers have endeavored to publish herein rates which do not exceed the aggregate of the intermediate rates between points between which there is an actual movement of traffic, but if there should be in this tariff any rate which is in excess of the aggregate of intermediates, or if through subsequent change in an intermediate factor any rate in this tariff becomes higher than the aggregate of intermediates in violation of the provisions of the fourth section of the act, carriers will reduce such rate to the aggregate of the intermediate rates on one day's notice under authority of Rule 56 of Interstate Commerce Commission Tariff Circular 20, on any commodity between points between which there is a movement or a prospective movement of that commodity. The publication of such reduced rate will be made within thirty days after such unlawful rate comes to carriers' notice. Carriers, parties to this tariff, whose rate over the route of movement is higher than the aggregate of the intermediates over that route, further agree that on any shipment on which the higher rate named in this tariff for that route has been charged, application will be made promptly to the Interstate Commerce Commission for authority to award reparation on the basis of the aggregate of intermediates in effect on date of shipment. (See Note). NOTE.-Carriers or shippers who discover combinations which result in lower charges than the rates named herein should promptly report such cases to the publishing agent of this tariff, showing the through rate and the item or page where it is found together with the separate factors which make up the combination, giving tariff reference by item or page, where possible, for each.
60	NATIONAL SERVICE ORDER TARIFF	This tariff is subject to provisions of various Interstate Commerce Commission Service Orders and General Permits as shown in National Service Order Tariff 1-D, WTL I.C.C. A-3949.
70	ALTERNATION CARLOAD RATES VARYING MINIMUM WEIGHTS	When two or more carload rates are provided in the same rate item for application on the same commodity from and to the same points, apply that rate which results in the lowest charge based upon the actual or authorized estimated weight of the shipment, but not less than the minimum weight published in connection with the rate used.
75	METHOD OF CANCELLING ITEMS	As this tariff is supplemented numbered items with letter suffixes cancel corresponding numbered items in the original tariff or in a prior supplement. Letter suffixes will be used in alphabetical sequence starting with A. EXAMPLE: Item 100-A cancels Item 100, and Item 200-B cancels Item 200-A in a prior supplement, which in turn cancelled Item 200.
80	INTERMEDIATE APPLICATION--ORIGIN	COMMODITY RATES APPLICABLE FROM INTERMEDIATE POINTS.-Subject to the provisions of Notes 1, 2, 3 and 4 below, from any point of origin from which a commodity rate on a given article to a given destination and via a given route is not named in a section of this tariff which refers to this rule, which point is intermediate to a point from which a commodity rate on said article is published in that same section of this tariff via a route through the intermediate point over which such commodity rate applies to the same destination, apply from such intermediate point to such destination and via such route the commodity rate in that same section of this tariff on said article from the next point beyond from which a commodity rate is published therein on that article to the same destination via the same route. NOTE 1.-When by reason of branch or diverging lines there are two or more "next beyond" points, apply the rate from the next point beyond (in this tariff) which on that article to the same destination via the same route results in the lowest charge. NOTE 2.-If the intermediate point is located between two points from which commodity rates on the same article via the same route are published in this tariff, apply via that route from the intermediate point the rate from the next point in either direction which results in the higher charge. In applying this Note, if there are two or more next beyond points due to branch or diverging lines, eliminate all such next beyond points except the point from which the lowest charge is applicable. NOTE 3.-If the class rate on the same article via the same route from the intermediate point produces a lower charge than would result from applying the commodity rate under this rule, such commodity rate will not apply. NOTE 4.-If there is in any other tariff a commodity rate on the same article from the intermediate origin point applicable over the same route to the same destination the provisions of this rule are not applicable from such intermediate origin point. EXCEPTIONS 1.-The provisions of this rule apply only in connection with rates published in sections of this tariff that specifically authorize the use of this rule. 2.-This rule does not apply when the use thereof produces a charge higher than the charge determined by the use of other rates published in this tariff for application on the same shipment from and to the same points and via the same route. (Departure from the terms of Rules 7(b) and 27 of Tariff Circular No. 20 is authorized under permission of the Interstate Commerce Commission, No. 20550 of April 8, 1944, as amended).

Item	SUBJECT	APPLICATION																			
85	INTERMEDIATE APPLICATION-- DESTINATION	COMMODITY RATES APPLICABLE TO INTERMEDIATE POINTS.--Subject to the provisions of Notes 1,2,3 and 4 below,to any point of destination to which a commodity rate on a given article from a given origin and via a given route is not named in a section of this tariff which refers to this rule,which point is intermediate to a point to which a commodity rate on said article is published in that same section of this tariff via a route through the intermediate point over which such commodity rate applies from the same origin,apply to such intermediate point from such origin and via such route the commodity rate in that same section of this tariff on said article to the next point beyond to which a commodity rate is published therein on that article from the same origin via the same route. NOTE 1.--When by reason of branch or diverging lines,there are two or more "next beyond" points,apply the rate to the next point beyond (in this tariff) which on that article from the same point of origin via the same route results in the lowest charge. NOTE 2.--If the intermediate point is located between two points to which commodity rates on the same article via the same route are published in this tariff,apply via that route to the intermediate point the rate to the next point in either direction which results in the higher charge. In applying this note,if there are two or more next beyond points due to branch or diverging lines,eliminate all such next beyond points except the point to which the lowest charge is applicable. NOTE 3.--If the class rate on the same article via the same route to the intermediate point produces a lower charge than would result from applying the commodity rate under this rule,such commodity rate will not apply. NOTE 4.--If there is in any other tariff a commodity rate on the same article to the intermediate destination point applicable over the same route from the same point of origin,the provisions of this rule are not applicable to such intermediate destination point. EXCEPTIONS 1.--The provisions of this rule apply only in connection with rates published in sections of this tariff that specifically authorize the use of this rule. 2.--This rule does not apply when the use thereof produces a charge higher than the charge determined by the use of other rates published in this tariff for application on the same shipment from and to the same points and via the same route. (Departure from the terms of Rules 7(b) and 27 of Tariff Circular No.20 is authorized under permission of the Interstate Commerce Commission,No.20550 of April 8, 1944,as amended).																			
87	INTERMEDIATE APPLICATION ON MINNESOTA INTRASTATE TRAFFIC	Except as otherwise specifically provided herein,rates to or from intermediate points to or from which specific commodity rates are not provided in this tariff will be the same as apply to or from the next more distant station to or from which rates are named herein.																			
90	FOURTH SECTION AUTHORITIES	This tariff contains rates that are higher for shorter than for longer distances over the same route. 190	PETROLEUM PRODUCTS IN TANK CARS OR BOX CARS, RETURNED TO SHIPPING POINT	When a shipment of Petroleum Products, Asphalt (Asphaltum), Petroleum Road Oil or Liquefied Petroleum Gas, in a tank car or in a box car, has reached destination but is not unloaded and is returned via the same route to the original shipping point (for reasons other than the carrier's error), the return movement will be subject to the rate in the reverse direction provided in this tariff in effect on the date the shipment is tendered for return, or to the rate normally applicable for such return movement if lower. Issued under authority of Interstate Commerce Commission Fourth Section Order 17762 of June 2, 1954 and Supplemental Fourth Section Order 17762 of July 25, 1962. The form of this publication is authorized under permission of the Interstate Commerce Commission No. 59684, as amended.
200	TANK CARS	The weight and charges on Oil Petroleum and its Products when transported in tank cars, will be based on the full gallonage capacity of the tank cars as provided in WTL Freight Tariff 300-I, I.C.C. A-4330, GN Tariff 501-Series, subject to outage allowance per Governing Classification. Petroleum or Petroleum Products, other than Fuel Oil or Road Oil, in tank cars, will be accepted for transportation only when consigned to parties accepting delivery on private sidings, or when consigned to parties accepting delivery from railroad sidings where facilities exist for piping the oil from tank cars to permanent storage tanks. When provision is made herein for rates on commodities in tank cars, such rates do not obligate the carrier to furnish tank cars.

SECTION 4--DISTANCE RATES

When rates are published in Section 1 or when rates therein are APPLICABLE from or to intermediate points under the provisions of Items 80 and 85, the rates named in this section on the same commodity from and to the same points, via the same route, will not apply.

If the charge accruing on a given shipment under Section 2 or 3 of this tariff is lower than that accruing under this Section, the charge accruing under Section 2 or 3 whichever is lower, will apply.

Except to the extent alternative application of rates is provided, the distance or mileage commodity rates shown herein may be used only when no specific through commodity rates from and to the same points have been provided, on the same shipment.

Rates apply on Petroleum or Petroleum Products, and related commodities, taking Columns 1, 2 and 5 rates, as described in, and subject to minimum weights provided in Items 300, 310 and 340.

Except as otherwise provided, the Distance Rates named below will apply between stations on the Great Northern Railway as follows:

1. Between stations in North Dakota (except on Intrastate traffic) and except to or from points in North Dakota where shipments pass through Montana en route.
2. Between stations in South Dakota (except on Intrastate traffic).
3. Between stations in Minnesota (except on Intrastate traffic).
4. Between stations in Wisconsin.
5. On traffic interchanged between the states of Minnesota, North Dakota, South Dakota, Iowa and Wisconsin, except to or from points in North Dakota, which pass through Montana en route.

EXCEPTION 1.--Rates named in Section 4 will not apply from or to St. Paul, Minneapolis, Minnesota Transfer, Hopkins, Duluth, Alford, Carlton, Scanlon, Cloquet, Minnesota, Dewey, Superior, Central Avenue (Superior) and Allouez, Wisconsin. Rates in Sections 1, 2 or 3 will apply.

EXCEPTION 2.--Rates named in Section 4 will not apply as a factor in making through rate based on any of the following points, viz.: Index Nos. 75 (Fridley, Minnesota) to 235 (Saunders, Wisconsin), inclusive.
